

Robust technology for autonomous measurements of climate data and microplastics *for all types of ships*

Nuno Nunes, Jana Fahning, Stefan Marx

SubCtech GmbH

11th FerryBox Workshop, 28-29 Sep. 2022, HZ Hereon Geesthacht

Zukunft Meer
sea our future

Understanding ocean & climate processes

- We need data to understand ocean and climate processes, but...
ocean data coverage is not homogeneous, large gaps exist

Source: Boris Kelly-Gerrey; NOC, EuroGOOS FerryBox Meeting, Goteborg 16-17 March 2010

- Data coverage is good in some regions, but large areas are still unknown.
⇒ effects on energy transport/climate models & predictions, etc.

Industrial

Standardized

Simplified

Main Rack

- Power controller / UPS
- NetDI Deck Unit:
controller, data logger
and data interface
- $p\text{CO}_2$ Analyzer
with auto-calibration
- Sensor integration:
debubbler / bypass
- Automatic cleaning

Nutrients Rack

- RO water tank
- Systea Nutrient Analyzer
- Cool storage for reagents
- Automatic cleaning
- Water supply and data:
integrated with main rack
or stand-alone

Parameter & Sensors

- Water CO₂
- Air CO₂
- TSG (SSS, SST)
- Optode (DO)
- SeaFET (pH)
- LISST 200x (particles)
- Fluorometer (div)
- PhytoFlash
- Water sampler
- Automatic cleaning
- Automatic calibration

“An unprecedented circumnavigation of high quality CO₂ data in 80 days. I think this has never been done before. That is a great testimony to the instrument that it survived a very bumpy ride!”

Toste Tanhua, GEOMAR
Feb. 2021

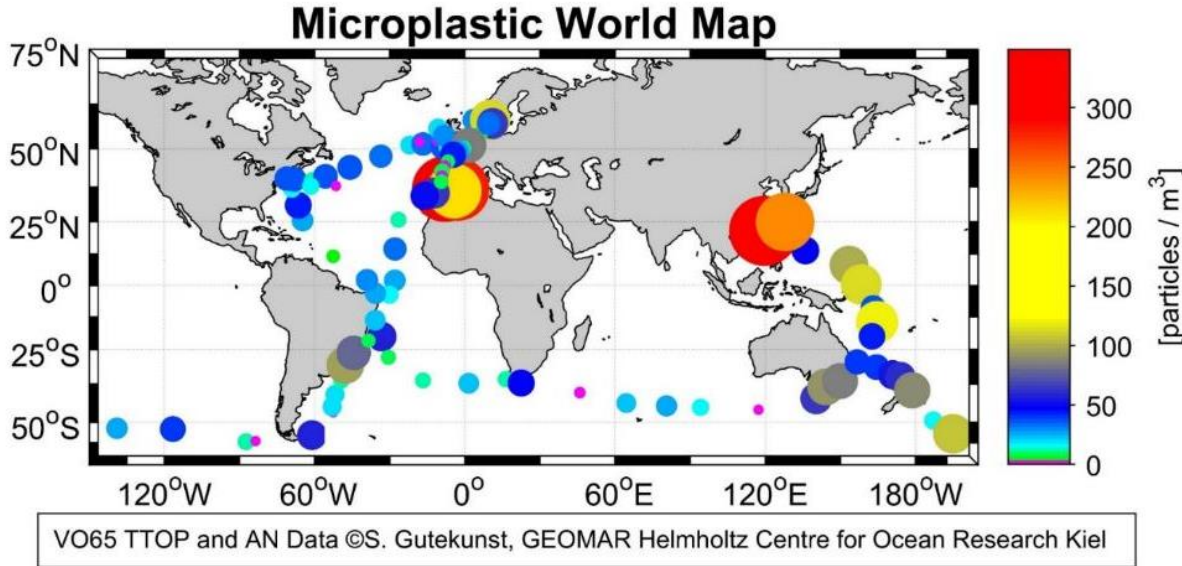

RACE® Microplastics Sampler flow-through

RACE® Microplastics Sampler for autonomous operation

Along-track CO2 during Vendée Globe 2020/21

- 80 days 24/7, round the world
- not a single record is missing
- no instrument errors

(Toste Tanhua, GEOMAR; Peter Landschützer, MPIM; Team Malizia)

“A new era of sailing for science is beginning, with support for vital ocean observations from the high-profile round-the-world [Vendée Globe](#) yacht race.”

OceanPack™ RACE® 6th generation

- Maintenance free and simple to use
- NMEA-0183 data recording
- State-of-the-art LI-COR® gas analyser
- Automatic calibration
- Proven track record since 2009
- Operating at $\pm 30^\circ$ roll, high speed
- Low-power 25W to 75W
- Compact and lightweight
- Modular and expandable
- Real-time telemetry

© Photo Volvo Ocean Race

- Mobile OceanPack™ solution
→ for smaller / charter vessels
- Ruggedised; robust flight case
- Simple installation: Plug & Play

- $p\text{CO}_2$ Analyzer with auto-calibration
- Sensor integration: debubbler or bypass
- External sensors: benchtop, meteo, etc.
- Automatic cleaning
