# Software and presentation: Color coded, real time & historical

Real-time: <http://on-line.msi.ttu.ee/eferry/>

Modem, GSM:  
OK, not full  
coverage In  
Baltic, data  
stored on SD

Real-Time display  
software in  
Google Maps  
OK

SmartGuard 5300  
OK after 1 software  
upgrade

WATER  
OUT

Cable for Chlorophyll

O<sub>2</sub>/Temp (4330)  
OK

Cond/Sal/Temp  
OK

Optode pCO<sub>2</sub>/Temp  
OK for 6 months,  
cavitation damaged foil

SubCTech pCO<sub>2</sub>  
Intila problems, now  
running for some days

- FLOW CHAMBER ASSEMBLY (5301S)
- WITH SENSORS:
- CONDUCTIVITY SENSOR (4319B)
- CYCLOPS 7 CHLD (4808)
- PRESSURE SENSOR (5217A)
- pCO<sub>2</sub> SENSOR (4797)

Chelsea UV Lux:  
Difficult, cross sensitive

Chelsea Trilux:  
LEDs needs exchange  
after 0.6 M measurements

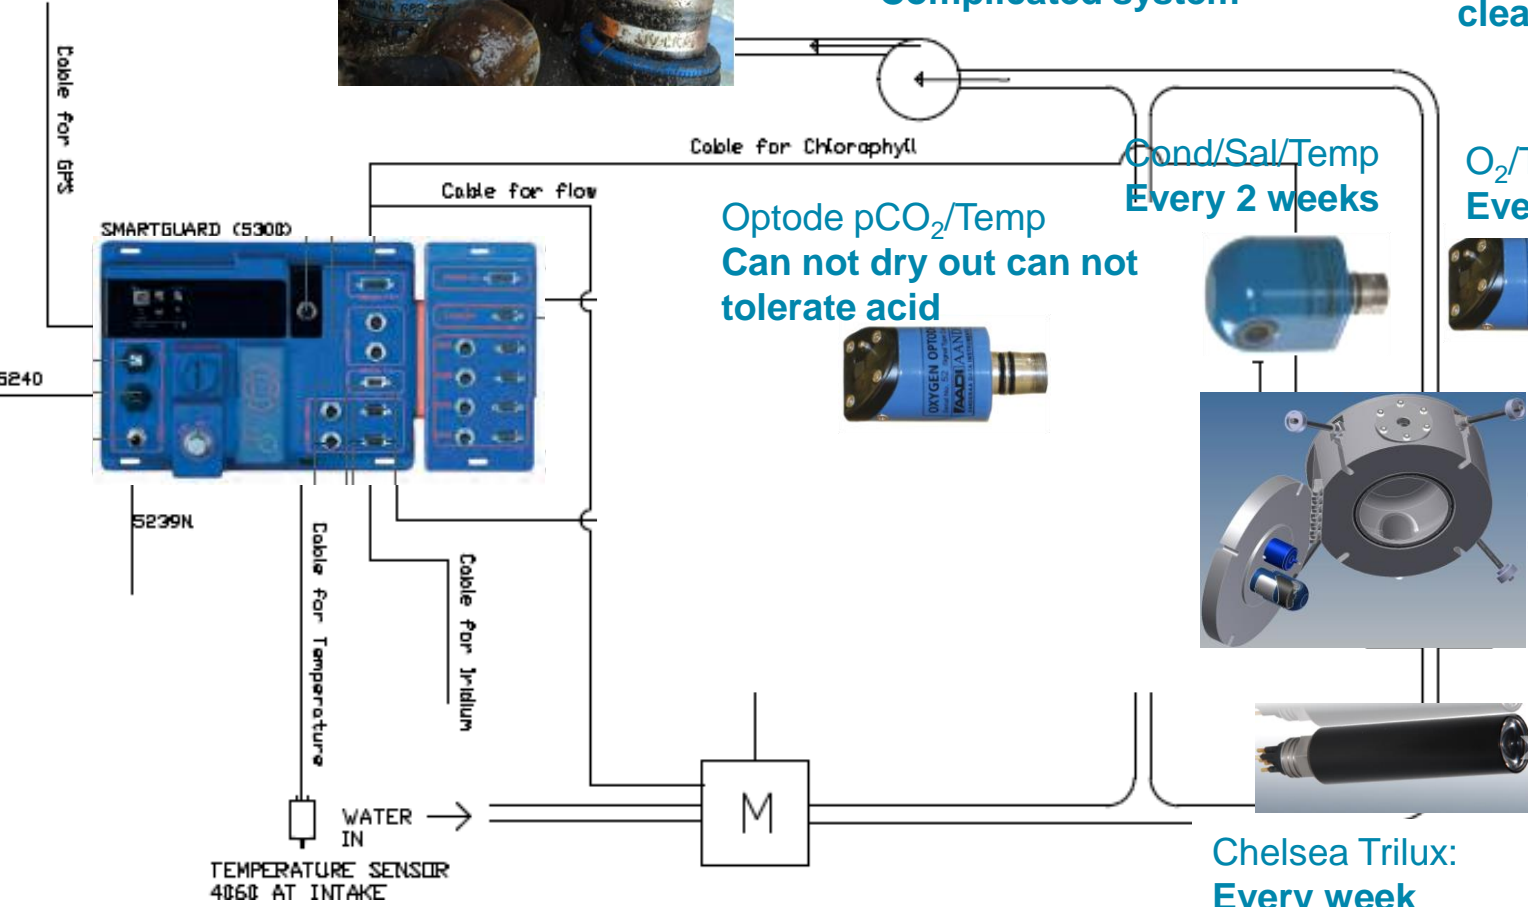

TEMPERATURE SENSOR  
4868 AT INTAKE

Sensor experience from Romantika, installed June 2013,  
running at 1 minute interval, about 1.1 Million measurements

4. Next step to combine UV light with Turn off pump and empty chamber in harbor, doubles cleaning interval

3. Acid rinsing no significant change, not desirable with chemicals. Complicated system

2. Turn off pump and empty chamber in harbor, doubles cleaning interval

Optode pCO<sub>2</sub>/Temp  
Can not dry out can not tolerate acid

Cond/Sal/Temp  
Every 2 weeks

O<sub>2</sub>/Temp (4330)  
Every 4 weeks

**1. Opening and Cleaning:**

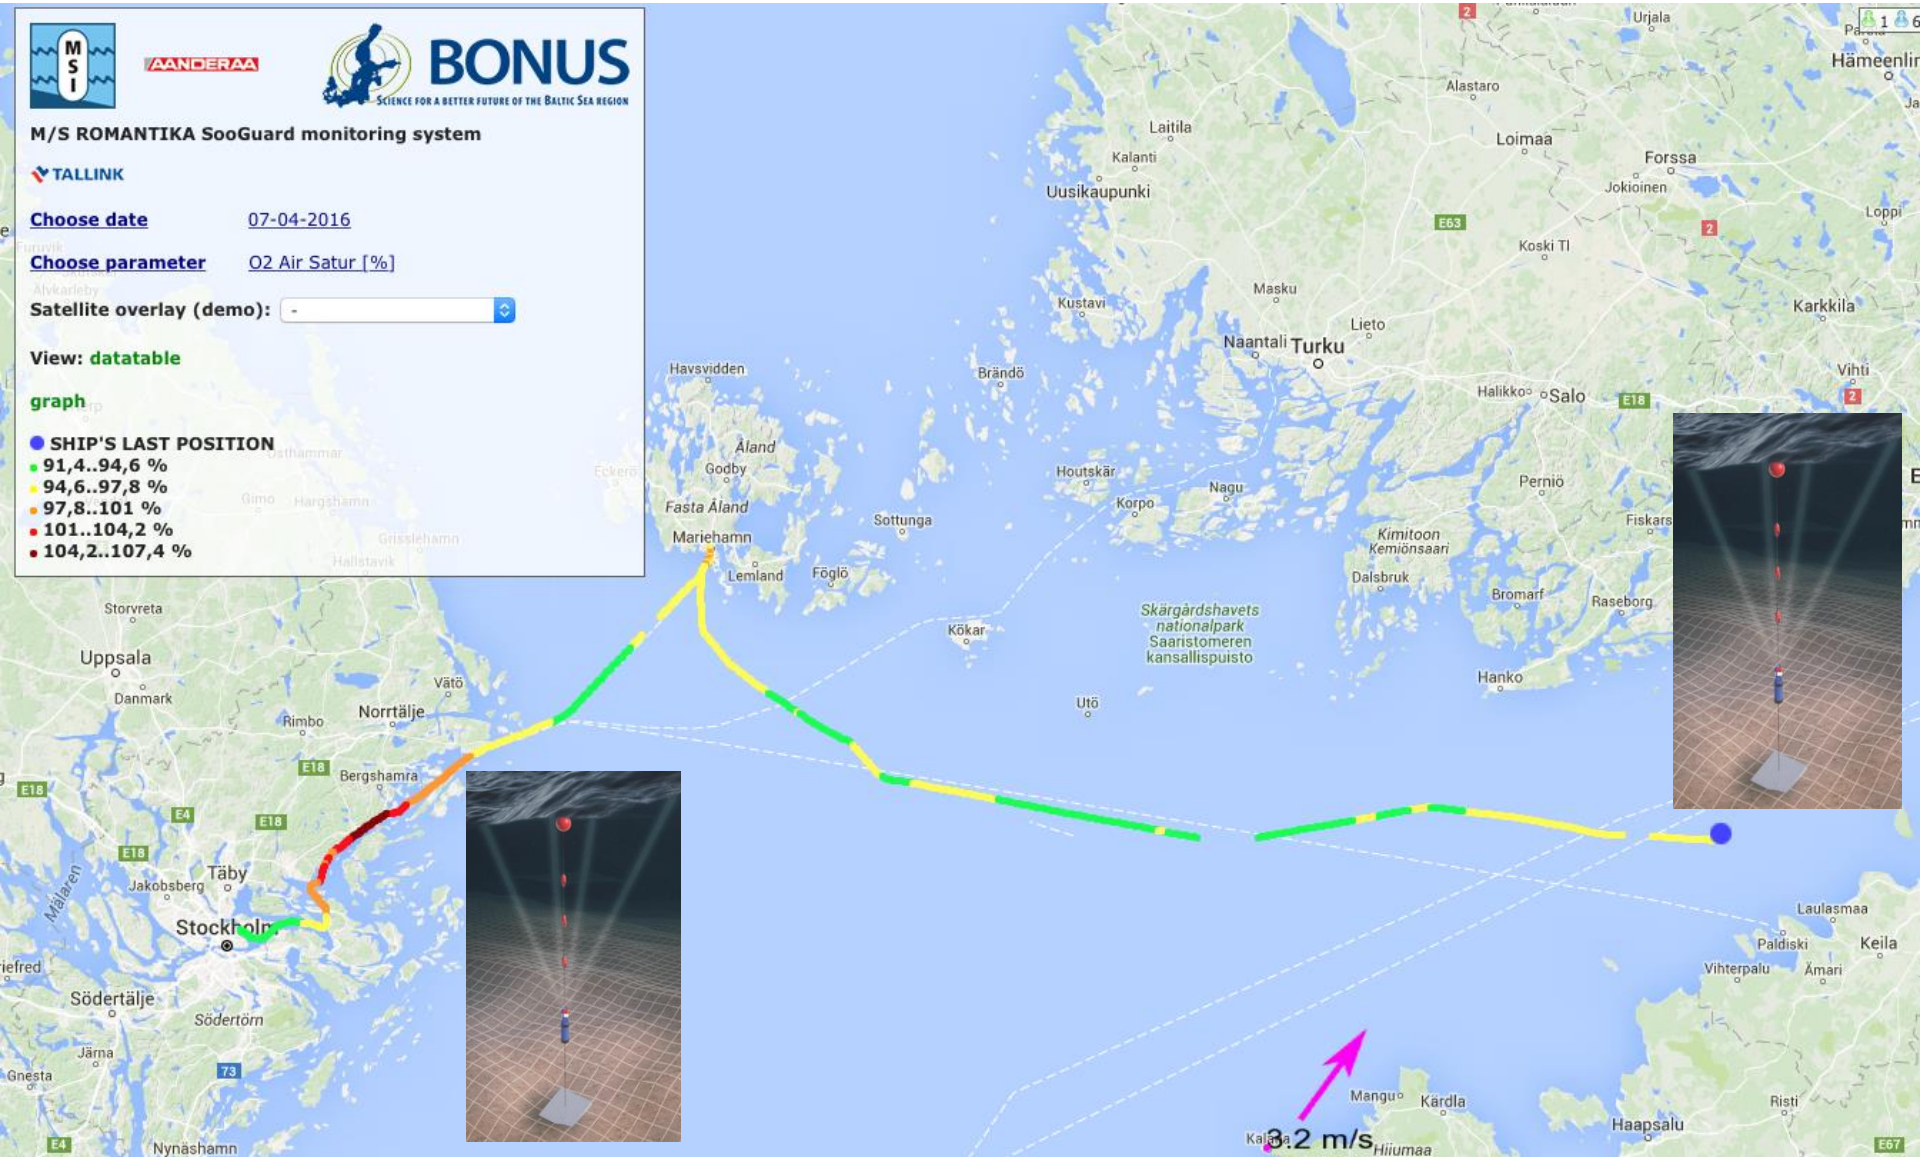

- Takes 5 min
- Every week in summer
- Every month in winter

Chelsea Trilux:  
Every week

Antifouling trials on Romantika, the goal is to run system unattended for 1 month in active season and 2 months in winter

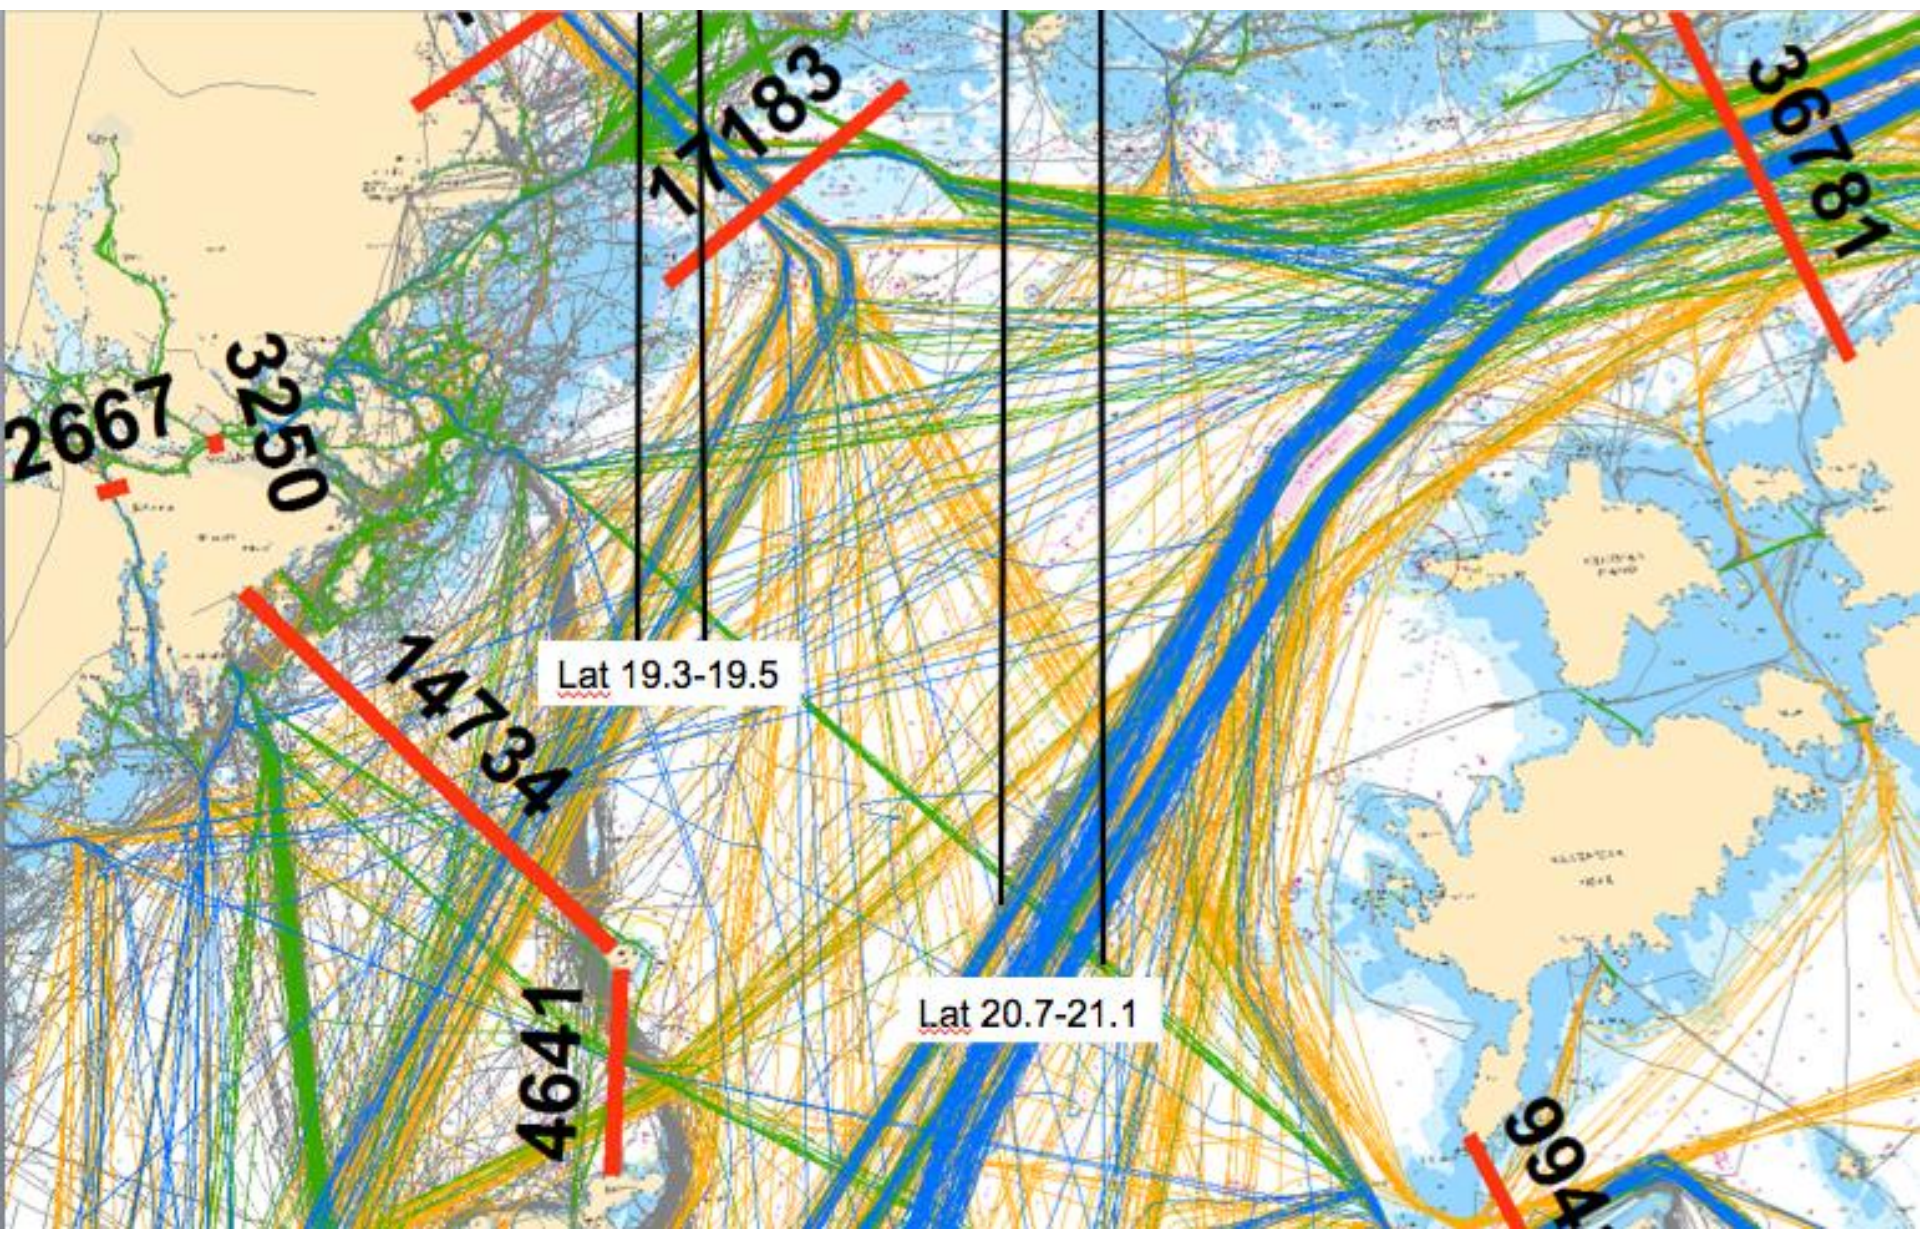

# Cross Referencing with similar sensors along the route will give mutual Quality Control, Delay in system and Time coverage
